SKILLS & TOOLS

Tools & Infrastructure

Git, Azure, AWS, Jenkins, VSCode, Rider, PyCharm, SQL Management Studio, Fiddler, Mushy, HxD (Binary Analysis), DB Browser

Automation & Programming

C#, SQL/SQLite, Blazor, PowerShell, HTML/CSS

QA Methodologies

Scrum/Agile Environments, Test Plan & Test Case Design, Automated Regression Strategies, Escaped Defect Testing (EDT)

Leadership & Collaboration

Technical Mentorship ("Tester as a Coach"), Cross-functional Team Leadership, JIRA & Confluence, CI/CD Pipeline Collaboration, RFP Evaluation

SABRINA (SAB) STRONG

Career Profile

QA & Test Specialist bringing extensive expertise in manual testing, data validation, and test automation. Known for sharp attention to detail and exceptional recall, excelling at bridging the gap between technical teams and non-technical stakeholders as a trusted translator. Recognized for expert-level troubleshooting, cross-functional collaboration, and mentoring engineering teams ("Tester as a Coach").

Professional Experience

Magnet Forensics | Waterloo, ON — 2017-2026

Software Test Specialist

- **Deep Technical Investigation:** Validated mobile and computer digital artifacts across diverse, complex device file structures (including SQLite databases, JSON data, plists, protobufs, and custom app binaries) via manual and automated methods, combined with physical and logical device acquisition (rooting, jailbreaking, and GreyKey).
- **Industry Authority:** Co-authored and presented original DFIR research on iOS PowerLog at a professional conference (published on YouTube by Forensic Focus), successfully resolving a critical time zone and offset parsing bug.
- **Testing Innovation & Culture:** Invented the Escaped Defect Testing (EDT) framework, creating a quantitative feedback loop to track quality blind spots.
- **Engineering & Leadership ("Tester as a Coach"):** Transitioned into a hybrid technical coach/developer role; mentoring 10+ software engineers on test architecture, authoring C# automation features, and unblocking CI/CD pipelines.

Lone Wolf Real Estate Technologies | Cambridge, ON — 2008-2017

QA Team Lead & Product Specialist

- **Test Leadership & Strategy:** Directed QA operations, establishing testing strategies, coverage metrics, and a default cross-functional SDLC data environment; partnered with the Build Master to streamline CI/CD environment refreshes via automated scripts and evaluated enterprise tooling.
- **Workflow Automation & Financial Logic:** Executed comprehensive manual testing for Waterfall programming changes while leveraging deep domain knowledge of legacy architecture to map out automated workflows—focusing heavily on core financial logic, server-date manipulations, and multi-month billing cycles.
- **Technical Operations & Client Escalations:** Progressed through foundational roles spanning front-line troubleshooting, coordinating internal development changes (drafting specs, task assignment, release management), and resolving high-level executive client escalations.
